TANK VENT FILTER HOUSINGS

Compressed Air & Process Filtration

Filter housings for out breathing and make-up air filtration on sterile storage tanks or transport vessels.

Donaldson® P-BE vent filter housings are developed for sterile ventilation of stationary and mobile storage tanks used in food, beverage, pharmaceutical, chemical and other industries.

The P-BE tank vent filter is available in 12 sizes with flow rates ranging from 1 to 1,200 cfm (at ambient pressure).

CHOOSE THE FILTER TO SUIT YOUR APPLICATION

The P-BE vent filter housings are usually used in conjunction with our P-SRF N process sterile air filter element to ensure sterile ventilation with very little pressure drop or air resistance. It can also be used with other filter elements, such as Teflon membrane or pleated stainless steel, to meet your specific requirements.
